0022洛谷P5720 一尺之棰

```
#include <iostream>
using namespace std;

int main() {
    int length, n = 1;
    cin >> length;
    while (length > 1) {
```

while（条件）{循环体：条件为ture时反复执行}

```
        length = length / 2;n++;
    }
    cout << n << endl;
    return 0;
}
```

完整代码

```
#include <iostream>
using namespace std;

int main() {
    int length, n = 1;
    cin >> length;
    while (length > 1) {

        length = length / 2;n++;
    }
    cout << n << endl;
    return 0;
}
```
