
二维前缀和
当(x>0)且(y>0)时:
可以发现,紫色区块和橙色区块在(0,0)到(x-1,y-1)这个区块的重叠的部分,要重减掉.
(0,0)到(x-1,y-1)这个区块所包地块价值的总和
(0,0)到(x,y-1)这个区块所包地块价值的总和
(0,0)
(N,M)
mp[x][y] + sum[x][y-1] + sum[x-1][y] - sum[x-1][y-1] = sum[x][y]
求差过程
(x-1,y2)
(x2,y-1)
整个命名区块区域为total
total = sum[x2][y2] - sum[x1][y2] - sum[x2][y1] + sum[x1][y1]
当y>0,x=0时
sum[x][y] = sum[x-1,y] + mp[x][y]
(x-1,0)
(x,0)
(x2,y2)
total = sum[x2][y2] - sum[x-1,y2]
当x>0,y=0时
sum[x][y] = sum[x][y-1] + mp[x][y]
(0,y)
(x2,y2)
(x2,y-1)
total = sum[x2][y2] - sum[x2,y-1]
